DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Schnittgrund et al. (Schnittgrund), EP 0 693 305 A1.

The Schnittgrund patent discloses the claimed steps of electrochemical oxidation, which would inherently separate the char from the graphite, since the reference discloses the same claimed temperature range, electrolyte composition (see abstract and col. 3, lines 34-48). The thermally decomposing portion of the method claimed would also be accomplished by the treatment in the bath within the claimed range.

Accordingly, the claims are anticipated.
